Alcatel i-211m-l specs

I've been a subscriber to Verizon FiOS ever since it came to our town back in May of 2007.Verizon installed a Tellabs 611 in the basement as well as the power unit and backup battery unit.Over the years, Verizon has offered faster Internet speeds to FiOS users. However, the old Tellabs ONTs max out at 75M. In order to subscribe to faster speeds, Verizon will need to replace the Tellabs with one manufactured by Alcatel-Lucent (now part of Nokia).The Verizon contractor mounted the ONT and enclosure on a new wooden backboard we installed for the new service. The installation looks nice. The ONT fits nicely inside the enclosure.I've seen online pictures of the Alcatel-Lucent I-211M-L units mounted within an enclosure. The internal cabling looks messy.Does anyone, who has FiOS at home, have the I-211M-L within the enclosure? I'd like to have some idea of how easy or difficult it is to have the inside of the enclosure wired clean & neat. All new installs receive a GPON ONT (even if there's an existing BPON ONT). In addition, all BPONs are replaced with GPONs during any tech visit. Phased out GPON ONTs still provide all the benefits a current deployment GPON does, but are just not being used for new installs anymore. The most common ONT used today is the Alcatel I-211M-L due to its small size and versatile nature.For a description of the different types and styles of ONTs, see: »Verizon FiOS FAQ »What are the different types and styles of ONTs?.GPON ONTs (Current Deployment):ManufacturerModelTypeStyleMoCA/CoaxEthernet/VDSL2POTSAlcateIl-211M-LSFUInteriorDesktopExterior1: MoCA1: 10/100/1G Ethernet2AlcatelO-24121G-AMDUShared1212: 10/100/1G Ethernet24AlcatelO-24121V-AMDUShared1212: VDSL224AlcatelO-821M-ASOHOExterior1: MoCA2: 10/100/1G Ethernet8Motorola1000-GI4SFUInterior1: MoCA1: 10/100/1G Ethernet2Motorola1000-GJ4SFUInterior1: MoCA1: 10/100/1G Ethernet2Motorola1000-GT4SFUExterior1: MoCA 1: 10/100/1G Ethernet 2Motorola14842SOHOExterior1: MoCA 5: 10/100/1G Ethernet 8Motorola6000-GETMDUShared1: MoCA12: 10/100/1G Ethernet24Motorola6000-GVTMDUShared1: MoCA12: VDSL224GPON ONTs (Phased Out):ManufacturerModelTypeStyleMoCA/CoaxEthernet/VDSL2POTSAlcateIl-211M-DSFUInterior1: MoCA1: 10/100/1G Ethernet2AlcateIl-211M-ESFUInterior1: MoCA1: 10/100/1G Ethernet2AlcateIl-211M-GSFUInterior1: MoCA1: 10/100/1G Ethernet2AlcateIl-211M-HSFUInterior1: MoCA1: 10/100/1G Ethernet2AlcateIl-211M-KSFUInteriorDesktopExterior1: MoCA1: 10/100/1G Ethernet2AlcatelO-211M-ESFUExterior1: MoCA1: 10/100/1G Ethernet2AlcatelO-211M-GSFUExterior 1: MoCA1: 10/100/1G Ethernet2AlcatelO-211M-HSFUExterior1: MoCA1: 10/100/1G Ethernet2AlcatelO-821G-DSOHOExterior1: Coax2: 10/100/1G Ethernet8AlcatelO-821M-ESOHOExterior1: MoCA2: 10/100/1G Ethernet8Motorola1000-GJ2SFUInterior1: MoCA1: 10/100/1G Ethernet2Motorola1000-GJISFUInterior1: MoCA1: 10/100/1G Ethernet2Motorola1000-GT2SFUExterior1: MoCA1: 10/100/1G Ethernet2Motorola1000-GT3SFUExterior1: MoCA1: 10/100/1G Ethernet2Motorola1000-GTISFUDesktop1: MoCA1: 10/100/1G Ethernet2Motorola1500-GSOHOExterior1: MoCA2: 10/100/1G Ethernet8Motorola6000-GETMDUShared12: MoCA12: 10/100/1G Ethernet24Motorola6000-GVTMDUShared12: MoCA12: VDSL224BPON ONTs (Phased Out):ManufacturerModelTypeStyleMoCA/CoaxEthernet/vDSLPOTSMax SpeedReplacementMotorola1000-JISFUInterior1: MoCA1: 10/100 Ethernet4 50/50 Motorola 1000-JI2Motorola1000-JI2SFUInterior1: MoCA1: 10/100 Ethernet2 50/50 Motorola1000-MSFUExterior1: MoCA1: 10/100 Ethernet4 50/50 Motorola1000-M3SFUExterior1: MoCA1: 10/100 Ethernet2 50/50 Motorola1000-MISFUInterior1: MoCA1: 10/100 Ethernet4 50/50 Motorola 1000-JI2Motorola1000-VSFUExterior1: Coax1: 10/100 Ethernet4 75/75 Motorola 1000-M Motorola 1000-M3Motorola6000-BETMDUShared12: MoCA12: 10/100 Ethernet24 50/50 Motorola6000-BVTMDUShared12: Coax12: vDSL124 30/5 Motorola6000-EMDUShared16: Coax16: 10/100 Ethernet24 50/50 Motorola 6000-BETMotorola6000-VMDUShared16: Coax16: vDSL124 30/5 Motorola 6000-BVTTellabs610SFUExterior1: Coax1: 10/100 Ethernet4 25/25 Tellabs 611 Tellabs 612ATellabs610XSFUExterior1: Coax1: 10/100 Ethernet4 25/25 Tellabs 611 Tellabs 612ATellabs611SFUExterior1: Coax1: 10/100 Ethernet4 75/75 Tellabs612SFUInteriorExterior1: MoCA1: 10/100 Ethernet2 75/75 Tellabs 612Tellabs612ASFUInteriorExterior1: MoCA1: 10/100 Ethernet2 75/75 Tellabs621MDUShared8: Coax8: 10/100 Ethernet16 75/75 Tellabs621RMDUShared8: Coax8: 10/100 Ethernet16 75/75 Tellabs625MDUShared8: Coax8: vDSL116 30/5 Tellabs625AMDUShared8: Coax8: vDSL116 30/5 Tellabs625ARMDUShared8: Coax8: vDSL116 30/5 Tellabs625RMDUShared8: Coax8: vDSL116 30/5 by More Fiber edited by Branch last modified: 2019-02-21 20:09:38Page 2 Show navigation Hide navigation /dev/nullFeedbackNextSite HelpTech and Provider chat and information forumsMembers sell stuff. Our super fast turnaround times and high quality stock located all around the world, mean we can ship same-day replacements exactly to where they are needed, minimising network downtime as much as possible. The ONT I-211M-L 3FE5234, like all of our hardware, is fully inspected and repackaged in our ESD and OEM compliant facility by our expert team and comes backed by a comprehensive warranty as standard.As an accredited and approved used telecoms partner to hundreds of renowned global service providers, OEMs and systems integrators worldwide, you can always rely on TXO to help you expand and maintain your networks quickly and economically. Whether you require a brand new product or one that has been refurbished, we source only the highest quality and environmentally-green market equipment. This is all available at the best possible prices, passing the substantial cost benefits directly back to you. The ONT I-211M-L 3FE5234 represents only one item available from our world class portfolio of hardware. This portfolio includes very well known industry names like Nokia, Siemens, Nortel, Ciena, Ericsson, Marconi, Alcatel, Lucent and many more. With almost one million parts in stock, and access to a further eight million through our partner network, we own one of the largest multi-vendor telecom inventories in the world—we are grateful to be able to share it with our clients. All parts are of known equipment provenance and we work to supply the most reliable, electronically functioning product available. All our products are screened and re-packed in new, unbranded ESD packaging, ensuring they reach you in the best possible condition. Our quality control processes mean that the return rate on the products we supply is less than 1%. In addition to the standard warranty, we can work within your supply chain to pre-agreed service level agreements. We offer bespoke test facilities in our purpose built 5,000 sq. ft. / 500 m² testing laboratory. All testing is performed in line with the original equipment manufacturer’s specification, in a simulated live traffic environment. You can find more information regarding this by reading our warranty policy. If you are looking for an experienced and reliable telecom hardware repair partner, we can help. Here at TXO we have a dedicated repair centre supporting clients with their repair needs down to board-level across optical, radio, IP and power disciplines. Contact our expert team for more information.Delivery times are as follows:CountryDelivery times*UK1 – 3 business daysEU2 – 4 business daysUSA4 – 5 business daysAll other countriesAvailable on request *As often as possible, orders of ONT I-211M-L 3FE5234 will be dispatched immediately on receipt of a purchase order. Delivery times for all other countries are available upon request, as they differ on a case-by-case basis. Next-day delivery and time-slot delivery may also be available upon request. These services are subject to the delivery address and usually incur a charge. To talk to us about your delivery needs, please get in touch.
